Office Action Summary

Application No.

10/729,681

Applicant(s)

MOORE ET AL.

Examiner

José V. Chen

Art Unit

3637

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-8 and 10-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-8, 10-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11, 2, 5, 6, 10, 13, 16-17, 12, 14, 15, 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim(s) 11, 12 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define "Virginia Tech Protocol specifications" and "GMA guidelines" so that an integral structure able to function as claimed is recited. Claims 2, 5, 6, 10, 13, 16, 17, 14, 15, 18 are indefinite in that they depend from an indefinite base claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wharton. The patent to Wharton teaches structure as claimed including collapsible pallet, comprising an upper deck (22), a foot member disposed on the upper deck, the foot member comprising a first foot half disposed on the upper deck, the first foot half having a pin disposed thereon, and a second foot half, the second foot half having a

Art Unit: 3637

hole disposed therein for receiving the pin, and a lower deck (24) comprising the second foot half, the pin is slidably disposed in the hole.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 11, 2, 5, 6, 10, 12, 13, 14, 15, 16, 17, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wharton. The patent to Wharton teaches structure as claimed including collapsible pallet, comprising an upper deck (22), a foot member disposed on the upper deck, the foot member comprising a first foot half disposed on the upper deck, the first foot half having a pin disposed thereon, and a second foot half, the second foot half having a hole disposed therein for receiving the pin, and a lower deck (24) comprising the second foot half, the pin is slidably disposed in the hole, deck members the only difference being the specific weight per area percentage. However, the use of different degrees of weight per area percentages are matters of desirability

Art Unit: 3637

and choice and materials used which would have been and well within the level of ordinary skill in the art at the time of the invention since such results are matters of materials and engineering mechanics, thereby providing structure as claimed. In response to applicant's remarks, it is repeated that the use of different degrees of weight percentages are matters of desirability which is routinely taught in strength of materials and engineering courses depending upon the parameters needed. To use this knowledge of different materials, densities to provide the well known effect of such materials would have been obvious and well within the level of ordinary skill in the art.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wharton as applied to the claims above, and further in view of Francis. The patent to Wharton teaches structure substantially as claimed as discussed above including connecting pin structure, the only difference being that the hole is not a keyhole slot type structure. However, the patent to Francis teaches the use of providing keyhole slot and pin structure for connection to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Wharton to include a keyhole slot connecting structure as taught by Francis since such structures are conventional alternative structures used in the same intended purpose, thereby providing structure as claimed. In response to applicant's remarks, it is the conventionality of the connectors that provides the motivation as the are both conventional alternative structures used in the same intended purpose.

Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wharton as applied to the claims above, and further in view of Daley. The patent to

Art Unit: 3637

Wharton teaches structure substantially as claimed as discussed above including a foot structure, the only difference being that there is no foam insert to strengthen the foot. However, the patent to Daley teaches the use of providing foam to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Wharton to include foam inserts as taught by Daley to provide increased strength since such structures are conventional alternative structures used in the same intended purpose, thereby providing structure as claimed.

Response to Arguments

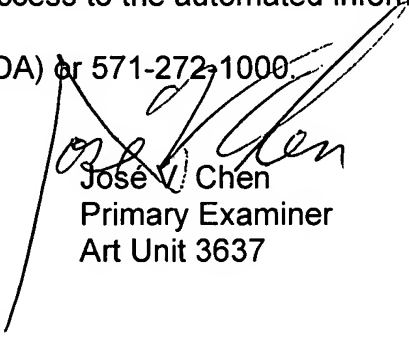

Applicant's arguments filed 08/07/06 have been fully considered but they are not persuasive.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to José V. Chen whose telephone number is (571)272-6865. The examiner can normally be reached on m-f,m-th 5:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571)272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3637

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
